

Assist. Lecturer Samir Abed Mohammed

Department of Biology

Assist. Lecturer of microbiology

Email: samir@alfarabiuc.edu.iq

Education:

MSc, University of Baghdad, Year 2017

BSc, University of Al_Falluja, Year 2014

Profile:

- I am obtained my bachelor's degree from the College of Veterinary Medicine at the University of Al_Falluja in 2014, and in 2017, I am obtained my master's degree in pharmacology and toxicology from the College of Veterinary Medicine at the University of Baghdad and was awarded the title of assistant lecturer by Al-Farabi University College.
- I was assigned to several committees within the Department of Life Sciences at Al-Farabi University College.

Teaching

1. Theoretical and Practical antibiotics (It deals with different topics about antibiotics, sterilizers and disinfectants used in our daily life, how to use them and their effectiveness on the different types of microorganisms that cause harm in the various details of our daily life, and knowing the types used for the purpose of sterilization, killing or inhibiting different pathogens.
2. - Theoretical and practical medical parasitology (dealing with various topics about parasites, their forms, life cycle, pathogenesis, laboratory diagnosis of all parasites of medical importance, and identification of parasite epidemiology, with special reference to those endemic to Iraq).

Research Focus

1. Find an alternative therapy for the used antibiotics that become less effective because of the bacterial resistant.
2. Knowing the effect of antibiotics on different types of bacteria.
