

Assist. Lecturer : Hind Adnan Mohammed

Department of: Nursing department

Email: hind.adnan@alfarabiuc.edu.iq

Education:

MSc, University of 2014 Year

BSc, University of 2011 Year

Profile:

-Started work in medical laboratory directly after graduation in 2011 and start study master degree in microbiology -I start worked as a teacher at Al-Farabi University College since 2015 in biology department teaching immunology and pathogenic bacteria. then moved to the Nursing Department, teaching Microbiology

Teaching

Fourth stage epidemiology: is the study (scientific, systematic, and data-driven) of the distribution (frequency, pattern) and determinants (causes, risk factors) of health-related states and events (not just diseases) in specified populations (neighborhood, school, city, state, country, global).

Second stage Microbiology: is the study of microscopic organisms, such as bacteria, viruses, archaea, fungi and protozoa. This discipline includes fundamental research on the biochemistry, physiology, cell biology, ecology, evolution and clinical aspects of microorganisms, including the host response to these agents.

Research Focus

Previously

- 1- pathogenic bacteria and effect on human health
- 2- immune respond for pathogenic infection

Currently

- 1- virology
- 2- cancer immunotherapy
- 3- virotherapy

Publications

1-The Cytotoxicity Effect of Pyocyanin on Human Hepatocellular Carcinoma

Cell Line (HepG2)
